**Current Opportunities**

We facilitate strategic opportunities within the mining and mineral sector by sourcing and presenting investment ready projects, mineral supply opportunities and Exclusive Prospecting Licenses (EPLs) to serious buyers and investors.

Our portfolio includes selected EPLs covering a range of high demand mineral commodities, including base metals, precious metals and gemstones. The opportunities presented below provide an overview of available projects currently open for investment, strategic partnerships, joint ventures, acquisitions and exploration funding.

To protect the confidentiality and commercial integrity of these projects only limited public information is displayed. Detailed technical documentation, geological reports and supporting data are available to **qualified and vetted** interested parties upon **formal engagement** and **NDA** execution.

Namibia remains one of Africa's most mining friendly jurisdictions, offering strong geological potential, political stability and growing global investment interest in the natural resources sector.

Reference	Mineral(s)	Region	EPL Status	Size (Ha)	Exploration Stage	Key Highlights	Opportunity Type
EPL- #PTE 001	Base, Critical & Precious metals	Kunene	Active	To be confirmed	Preliminary Exploration	Prospectivity for a significant mineralized system	Joint Venture
EPL- #PTE 002	Nuclear Fuel	Erongo	Active	±15,000 Ha	Advanced Phase	Prospectivity for Multiple Uranium Types.	Joint Venture
EPL- #PTE 003	Nuclear Fuel, Base & Rare metals	Erongo	Active	±16,000 Ha	Preliminary Exploration	High mineralized regional belt	Joint Venture
EPL - #PTE 004	Base& Rare metals	Karas	Active	± 25,000	Advanced Phase	Confirmed copper mineralization structures	Joint Venture

EPL-PTE 004	Base Rare  Precious Metals  Industrial Minerals	Khomas	Active	±8,000	Preliminary Exploration	Highly prospective for Cu-Ag mineralisation	Joint Venture or Buy out
EPL-#PTE 005	Base Rare  Precious Metals  Industrial Minerals  Dimension stone	Otjozon-djupa	Active	±14,000	Preliminary Exploration	Located in a proven metallogenic province	Joint Venture or Buy out
EPL-#PTE 006	Base Rare  Precious Metals  Industrial Minerals  Dimension stone	Otjozon-djupa	Active	±4,000	Preliminary Exploration	Moderate to high manganese mineralisation potential	Joint Venture or Buy out
EPL-#PTE 007	Nuclear Fuel  Base Rare  Precious Metals  Industrial Minerals  Dimension stone	Karas	Active	±6,000	Preliminary Exploration	lithium, tantalum, tin and Ni-Cu mineralisation potential.	Joint Venture or Buy out
EPL-#PTE 008	Base Rare  Precious Metals  Industrial Minerals  Dimension stone	Khomas	Active	±20,000	Preliminary Exploration	Copper Belt-style Cu-Ag mineralisation	Joint Venture or Buy out
EPL-#PTE 009	Manganese with iron-rich formations	Otjozon-djupa	Active	To be confirmed	Preliminary Exploration	Located in known manganese district.	Joint Venture or buy out
